Pricing plans

Overview

Voxagent is an enterprise software platform for automating business voice communications with artificial intelligence. The platform covers the design and operation of AI agents for inbound and outbound phone calls, integration with CRM, telephony and customer business systems, and end-to-end implementation support.

The cost of use is structured around one of the three pricing plans described below. Prices are denominated in Russian roubles (₽) and represent the monthly subscription fee when paid within the Russian Federation.

The current pricing matrix is published at <https://voxagent.ru/#pricing>

Pricing plans

"Start" plan — small business

Cost: from 50,000 ₽ per month

Included:

- 1 voice AI agent with 1 dialog scenario
- Inbound call handling 24/7
- Connection to one customer CRM and a calendar
- Continuous scenario tuning based on conversation analysis
- Weekly dashboard with agent performance metrics

Best fit: small companies with a single business line, a limited inbound call volume (up to one phone number) and standard integration requirements.

"Growth" plan — mid-market

Cost: 150,000 ₽ per month

Included:

- Multiple voice AI agents with multiple dialog scenarios
- Inbound and outbound calls (including bulk outbound campaigns)
- Routing across multiple phone numbers
- Deep integrations with customer business systems (CRM, ERP, custom APIs)

- Monthly strategy session on agent development

Best fit: companies with multiple call streams, sales and support divisions, outbound calling needs, and non-trivial integration requirements.

"Scale" plan — enterprise and chains

Cost: negotiable, quoted individually

Included:

- Multiple sites and/or brands within a single account
- Custom integrations with any customer internal systems
- SLA with guaranteed response time and priority scenario tuning
- Dedicated account manager
- Security and personal-data processing audit in line with Federal Law No. 152-FZ

Best fit: holdings, retail chains and multi-brand companies with elevated requirements for security, data isolation and integrations.

Payment terms

- **Settlement currency** — Russian rouble (₽).
- **Billing period** — calendar month. Quarterly and yearly prepayment are available by mutual agreement.
- **Voice-minute overage** beyond the limit included in the plan is billed separately at the rates fixed in the contract.
- **Taxation** — prices are listed without VAT (simplified taxation regime).
- **New integrations** beyond the ones included in the plan are billed separately.
- **Payment method** — bank transfer based on an invoice issued by the copyright holder.

Add-on services

Available on every plan. Fixed prices, billed monthly upon activation or as a one-time charge per volume.

Service	Cost
Additional integration	from 5,000 ₺ per month per integration
Voice minutes over plan limit	12,500 ₺ per 500 minutes (one-time charge)
Additional concurrent line	1,000 ₺ per month per line
Scenario tuning and improvements	per agreed scope of work

Obtaining a quote

The exact price for a given customer is calculated individually based on expected voice-minute volume, phone-number count, required integrations and the support tier. To obtain a quote and sign a contract use the channels below:
